

KANCHAN DEVANAND DESHMUKH

Software Developer | Python & MERN Stack | SIH National Finalist

kanchan.dd2005@gmail.com | 8999078423 | [LinkedIn](#) | [GitHub](#)

SUMMARY

Final-year Computer Engineering student with hands-on experience in Python and full-stack web development (MERN). Smart India Hackathon National Finalist (2024) and Team Leader (2025), with experience researching and designing solutions for government-scale problem statements. Comfortable working across the stack — from database schema design to responsive UI — and collaborating in team environments using Git/GitHub. Seeking a software development internship to build practical, real-world applications.

ACHIEVEMENTS

Smart India Hackathon (SIH) 2024 — National Finalist

Team Project — Fire Department Emergency Response Platform (Web & App)

- Advanced to the national final round building an emergency response platform for the fire department (web & app); led UI design and domain research, competing against teams selected from a national applicant pool

Smart India Hackathon (SIH) 2025 — Team Leader, Team of 6

Team RAYA 2.0 — "ASTRA": Technology Intelligence & Forecasting Platform (DRDO Problem Statement)

- Led a 6-member team through SIH 2025 internal rounds, coordinating task delegation and contributing to UI/prototype design and technical proposal documentation
- Proposed a system architecture (RAG-based LLM, multi-agent workflow, predictive forecasting) for a DRDO technology-intelligence platform, and designed prototype UI screens to demonstrate the concept; advanced through internal rounds but not selected as a national finalist

PROJECT

Smart Classroom Attendance System — Group Project, MERN Stack

github.com/Kanchan1903/attendance-system-mern

Jan 2025 – Apr 2025

Live Demo: attendance-system-mern.vercel.app

- Designed and implemented a normalized MongoDB schema to store and query student attendance records, improving data consistency and reducing redundant entries
- Built responsive HTML/CSS UI components for the attendance dashboard, ensuring a clean, consistent user experience across screen sizes
- Collaborated with a team of developers to integrate frontend UI with backend REST APIs, using Git/GitHub for version control throughout the project lifecycle

Technologies: MongoDB, Express.js, React.js (basic), Node.js, HTML, CSS, Git

EDUCATION

Bachelor of Technology in Computer Engineering

2023 – 2027

Bajaj Institute of Technology, Wardha

SKILLS

- Programming:** Python, JavaScript
- Databases:** MongoDB, SQL (MySQL)
- Frontend:** HTML, CSS, React.js (basic)
- Tools:** Git, GitHub
- Other:** UI Design, Problem-Solving

CERTIFICATIONS

- The Joy of Computing using Python — NPTEL, IIT Madras (Elite Certificate), 2026
- Programming in Python — Coursera (Meta), Verified Certificate
