KANCHAN DEVANAND DESHMUKH

Aspiring Data Analyst | Python, SQL, Power BI & Data Visualization
kanchan.dd2005@gmail.com | 8999078423 | LinkedIn | GitHub | Portfolio

SUMMARY

Computer Engineering student with hands-on data analytics experience in Python (Pandas, NumPy, Scikit-learn), SQL, and Power BI. Internship experience with Thiranex, YuvaIntern, and Cognifyz, plus independent projects in EDA, K-Means customer segmentation, sales forecasting, and Power BI dashboards. Research experience from two Smart India Hackathon cycles, including a forecasting framework for a DRDO problem statement. Looking for a Data Analyst role where I can apply these skills.

SKILLS

Data & Analysis: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), Power BI (Power Query, DAX), Excel
Databases: SQL (MySQL: SELECT, JOINs, WHERE, GROUP BY, aggregates), MongoDB (schema design & normalization)
Statistics & ML: RFM analysis, K-Means, linear/seasonal regression, hypothesis testing, model evaluation (MAE, RMSE, R^2)
Web & Tools: HTML, CSS, JavaScript, React.js (basic), Git, GitHub, Google Colab, Jupyter Notebook

EXPERIENCE

Data Analyst Intern — Thiranex Sep 2026 – Oct 2026

- Cleaned, structured, and analyzed real-world datasets using Python (Pandas, NumPy) and SQL for reporting
- Built Power BI dashboards and applied EDA to identify patterns and generate actionable business insights

Data Analysis Intern — Cognifyz IT Solutions Pvt. Ltd.

- Python-based data analysis internship covering data cleaning and preprocessing, statistical analysis, and data visualization

Virtual Data Science with Python Apprentice Intern — YuvaIntern (NSDC) Aug 2026

- Completed a virtual apprenticeship covering Python fundamentals and core data science workflows

PROJECTS

Predictive Analytics — Sales Forecasting GitHub

- Compared 3 regression models (baseline, lag-feature, seasonal) on ~9,994 Superstore records, improving R^2 from 0.49 to 0.634
- Engineered lag/seasonal features, evaluated with MAE/RMSE/R^2, and forecasted 6 months of sales

Technologies: Python, Pandas, NumPy, Matplotlib, Scikit-learn

Customer Segmentation using RFM & K-Means GitHub

- Cleaned 541,909 UCI Online Retail transactions to 3,741 customers; computed RFM metrics and applied K-Means (Elbow, Silhouette) to find 3 segments
- Built an interactive Power BI dashboard of segment behavior to support retention and re-engagement recommendations

Technologies: Python, Pandas, Scikit-learn, Power BI

Sales & Revenue Analysis — Power BI Dashboard GitHub

- Analyzed ~$118.73M in revenue across products, countries, and segments with year/country/segment slicers
- Wrote DAX measures (revenue, profit margin, YoY growth) and used Power Query for cleaning; delivered business recommendations

Technologies: Power BI, Power Query, DAX, Excel

Python Data Analytics Internship Project GitHub

- Completed a 5-week Titanic dataset project: data cleaning, EDA, hypothesis testing, and ML modeling
- Built a Logistic Regression model with 80.45% accuracy and 0.8511 ROC-AUC

Technologies: Python, Pandas, NumPy, Matplotlib, Seaborn, SciPy, Scikit-learn

ACHIEVEMENTS

Smart India Hackathon 2024 — National Finalist

- Reached the national final building a fire department emergency response platform (web & app); led UI design and domain research

Smart India Hackathon 2025 — Team Leader, Team of 6

- Led team RAYA 2.0 on "ASTRA", a Technology Intelligence & Forecasting Platform (DRDO problem statement); coordinated tasks, UI/prototype design, and proposal documentation

EDUCATION

Bachelor of Technology in Computer Engineering 2023 – 2027
Bajaj Institute of Technology, Wardha

CERTIFICATIONS

- The Joy of Computing using Python — NPTEL, IIT Madras (Elite Certificate), 2026
- Programming in Python — Coursera (Meta), Verified Certificate
- Virtual Data Science with Python — YuvaIntern (NSDC), 2026
- Data Analyst Internship — Thiranex, 2026
